

Ananth Technologies

Forging innovative results through technologies

Microsoft Practice

The Microsoft Technology practice and its services are an integral component of Ananth's overall enterprise software offerings. From architecture consulting to custom application development to migration, Ananth provides a whole suite of solutions and services around Microsoft Technologies. Expertise includes application development on the Microsoft .NET platform as well customizations of business solutions including Sharepoint, BizTalk and Commerce servers in addition to the SQL database.

Consultants and developers in the practice are industry seasoned professionals with 300+ man years of business consulting and implementation experience across Microsoft products. Ananth has a successful track record of having delivered over 50 implementations for over 30 global customers. With these offerings Ananth enables customers to streamline their business processes, enhance collaboration and manage and grow customers and drive better decision making across the enterprise.

.NET Application Development

Microsoft .NET technology provides the ability to quickly build, deploy, manage, and use connected, robust and secure solutions. .NET-connected solutions enable businesses to integrate their systems more rapidly and in a more agile manner and help them realize the promise of information anytime, anywhere, on any device. Ananth helps companies design, develop and integrate business solutions based on the .NET platform.

Our broad range of .NET expertise includes the following services:

- .NET based design and application development
- Managing upgrades and technical support for existing custom and packaged apps
- Migrating legacy applications to .NET
- .NET architecture and design evaluation
- Developing web services using the .NET framework and the SOAP toolkit

SharePoint Server

SharePoint Server is an integrated suite providing comprehensive content management, enterprise search, business processes and facilitating information-sharing across boundaries. Ananth has developed tried and tested methodologies that rapidly help you reap the business benefits you seek from your SharePoint solution.

Ananth has extensive experience with SharePoint features, including portal features, document, records and Web content management, search, business processes, business data catalog, and reporting. We have performed several SharePoint customizations as well:

- Search customizations to integrate with third parties like autonomy search
- User profile management with LDAP integration
- Documentum integration
- Workflow customization combining SharePoint designer, WF, and Visual Studio
- SharePoint UI customization. Themes and layouts. InfoPath forms in SharePoint.

Forging innovative results through technologies

Commerce Server

Ananth helps you build highly evolved ecommerce applications that integrate smoothly with your existing back-end

Ananth has worked on several Commerce solutions across multiple user segments - B2B, B2C, targeted, and more. We have ensured smooth integration with back-end systems, and conducted pain-free migration from existing non-Commerce, non-MS solutions. Ananth has a robust framework-based approach to developing MS Commerce Server solutions, enabling built-in extensibility and maintainability features within the solution design.

Why Ananth?

- Significant experience in designing, building and maintaining a wide variety of Commerce applications
- Technical depth complemented by a team of domain knowledge business analysts

BizTalk Server

BizTalk Server provides the tools and infrastructure required to exchange business documents among various platforms and OSs regardless of the application being used to process the documents. It also provides a standard gateway for sending and receiving documents via the Internet. Thus, BizTalk Server has the potential to change the way business is handled, and assures that the right information is available at the right time.

Ananth has mastered BizTalk integration challenges like those between legacy applications and .NET applications etc.

Why Ananth?

The Ananth team comprises certified BizTalk developers and technical leads with extensive hands-on experience with different tools and technologies. We have provided integrated, customized and scalable solutions to many global enterprises.

Ananth Microsoft Services

Ananth provides a whole suite of services and solutions around Microsoft technologies including the .NET framework and business solutions including BizTalk Server, SharePoint Server and Commerce Server.

Services expertise includes:

- Technology consulting
- Custom development
- Migration
- Upgrade
