

# Ananth Technologies

Forging innovative results through technologies

## SAP Services

Leveraging SAP applications and technologies, Ananth can help clients build distinctive capabilities that drive high performance. Ananth knows what it takes to develop and deliver SAP-based systems that address an organization's unique business needs. Our global delivery teams work on a number of SAP projects every year that help our clients exploit new technologies and drive delivery excellence. Ananth provides the best people and a long-standing alliance with SAP to help our clients get creative in driving business value from enterprise systems.

Our comprehensive portfolio of offerings span the complete life cycle of SAP enterprise solutions — enabling you to transform, enhance, and optimize. We work with you to develop, deploy, implement the solution and support it, delivering the results you set out to achieve.

### Ananth SAP Solution Offerings

Pre-Implementation	Implementation	Post-implementation
<ul style="list-style-type: none"><li>▪ SAP Solution Prototyping</li><li>▪ SAP Landscape Planning</li><li>▪ Business Process Harmonization</li><li>▪ Solution Strategy and Roadmap</li><li>▪ KPI and Business Benefit Definition</li></ul>	<ul style="list-style-type: none"><li>▪ End-To-end Implementation</li><li>▪ System and Data Migration</li><li>▪ SAP Testing</li><li>▪ System integration (using NetWeaver)</li></ul>	<ul style="list-style-type: none"><li>▪ SAP Upgrade</li><li>▪ Global Roll outs</li><li>▪ Support</li><li>▪ SAP Audit and Due Diligence</li></ul>

Ananth SAP expertise spans both the functional and technical spheres of SAP. To list some of the modules of specialized expertise, it would include **HCM, FI, CO, Logistics** and **BI** and technically Ananth has strong **Basis** and **NetWeaver** delivery teams.

## Delivery Model and Methodology

The Ananth Global Delivery Model is our framework for efficiently and effectively delivering consulting and outsourcing solutions. It includes global delivery centers; multidisciplinary teams; and standard methodologies, tools and architectures that greatly enhance productivity, as well as ensure reliability. Ananth's approach to delivery excellence capitalizes on our multitude of experience implementing SAP based solutions and our wealth of SAP specific repeatable methodologies and facilities helping return quicker business value for clients.

Ananth is able to blend talent from local and remote locations to provide clients with the best of both worlds: service close to home, wherever they are located and flexible around-the-clock collaboration for large-scale support. Ananth's delivery methods for SAP are a project accelerator as well as a set of tested guidelines for delivering quality solutions. Our methods identify what needs to be done and how it can be best accomplished

## Key Engagements

Ananth has been supporting its clientele across various verticals with a spectrum of services—consulting, end-to-end implementations, upgrades, and support—helping customers derive optimal value from their SAP investments. Some very recent engagements include:

- An SAP supported comprehensive Student Lifecycle Management (SLCM) solution for a reputed university with a student population of about 10,000. This solution enabled automated and integrated processes right from student admission through graduation and was also rated to have improved the overall student satisfaction.
- End to end SAP implementation for a leading contract research and testing organization. This firm was expanding at a fast pace, with the addition of number of new customers, hundreds of new employees and the opening of additional sites. The previous 'Excel' based, uncoordinated departmental silos with multiple versions of the same truth was no longer working. The implemented SAP system (HCM, FI/CO, BI) has not only kept up with their current growth but is ready to handle further expansion as well.
- A leading American generic drug manufacturer had already implemented SAP, but their numerous both large and small scale projects were being tracked with informal tools leading to typical slippage in schedules and cost over runs. Ananth architected, designed and developed a Project Systems (PS) based solution enabling constant monitoring of all aspects of projects with necessary insights. Since, significantly few projects missed schedules and costs were contained.
- A global mining corporation, with mine sites located in Africa and Asia, required 24x7 reliable and cost effective support for their global SAP systems. Ananth has been achieving all their SLAs effectively for the last two years.

## Ananth Services

### Implementation

End to end Implementation. Competencies in HCM, FI/CO, Logistics, BI and CRM

- Rollouts
- System and Data Migration
- Testing
- System Integration (using SAP Net Weaver)

### Upgrade Services

- Upgrade Assessment and Deployment
